
THE FINAL WALKTHROUGH · FIELD NOTE 17

Inspect the bathroom from the doorway.

A final bathroom inspection should follow the same route each time. Check visible cleanliness and readiness without treating appearance as proof of disinfection.

YOUR KIT

Task checklist; good light; fresh inspection cloth if needed

THEN LOWER YOUR EYE LINE. · EDITORIAL PHOTOGRAPHY

Three deliberate steps.

01 Take the wide view

Start at the doorway. Check the floor route, bins, bath or shower, toilet, sink, and mirror for obvious unfinished work.

02 Look at the edges

Check faucet bases, behind accessible toilet surfaces, shower-door tracks, and reachable corners. Use separate toilet tools for any touch-up.

03 Check it dry

Look at mirrors and fittings in side light. Confirm products and equipment are removed and the floor is dry enough for safe use.

The final check.

- ☐ Touch points checked
- ☐ No tools or residue left behind
- ☐ Safe dry walking route

Know when to pause.

Do not use a visual inspection to claim a surface is sterile or disinfected. Required disinfection depends on the correct product and process.

The inspection route catches what the cleaning route missed.

Always follow the surface maker's care instructions and product label. Never mix cleaning products. This guide is for ordinary household care, not hazardous-material remediation. Product-specific instructions take priority.
