
MADE FOR UTAH · FIELD NOTE 22

After a dusty week, reset the room.

Dry weather and everyday activity can leave visible dust around a home. This is a household cleaning routine, not an air-quality treatment or a medical claim.

YOUR KIT

Clean cloths; suitable vacuum; washable entry mat

CHASING DUST WORKS BETTER WITH A ROUTE. · EDITORIAL PHOTOGRAPHY

Three deliberate steps.

01 Reduce the carry-in

Clear the entrance, maintain your mat, and place shoes where they will not track across the room. Close up the work zone if outdoor conditions make open windows unsuitable.

02 Capture the settled dust

Work from reachable upper surfaces down, using a surface-safe cloth. Change cloth faces instead of shaking them into the air.

03 Finish the floor and tools

Vacuum edges and the open floor with suitable equipment. Follow the machine's maintenance instructions and return textiles only when clean and dry.

The final check.

☐ Entry reset

☐ Reachable ledges wiped

☐ Floor and tools finished

Know when to pause.

Dust from construction, suspect materials, or hazardous contamination needs an appropriate assessment. Do not sweep unknown fine construction dust into the air.

Clean the settled dust without promising to fix the air.

Always follow the surface maker's care instructions and product label. Never mix cleaning products. This guide is for ordinary household care, not hazardous-material remediation. Product-specific instructions take priority.
