
A CALMER HOME · FIELD NOTE 14

Give every cloth a job.

A simple cloth system helps avoid taking bathroom residue into the kitchen. Assign clear jobs and a separate place for used cloths before the first spray.

YOUR KIT

Several clean microfiber cloths; separate used-cloth bag; laundry instructions

THAT CLOTH HAS ALREADY BEEN SOMEWHERE. · AI-GENERATED EDITORIAL STILL LIFE

Three deliberate steps.

01 Assign the zones

Keep toilet, bathroom, kitchen, and general dusting cloths separate. Use colors, labels, or different storage compartments you can recognize immediately.

02 Turn to a clean face

Fold the cloth and use clean faces as you work. Once soiled, put it in the used-cloth bag; do not return it to the clean stack.

03 Launder for the next reset

Follow the cloth maker's wash instructions. Avoid additives it prohibits, dry as directed, and store clean cloths fully dry.

The final check.

- ☐ Toilet cloth kept separate
- ☐ Used cloths contained
- ☐ Clean supply dry and ready

Know when to pause.

A color system does not disinfect a cloth. Follow appropriate cleaning and laundry instructions for the task.

The system is only useful if everyone follows it.

Always follow the surface maker's care instructions and product label. Never mix cleaning products. This guide is for ordinary household care, not hazardous-material remediation. Product-specific instructions take priority.
